RESUME SUMMARY

Performance marketer with 4 years of experience running Meta and Google Ads for ecommerce brands across the UAE and Bangladesh. Lifted ROAS from 2.1x to 3.4x in six months while managing AED 40,000 monthly budgets. Skilled in GA4, Looker Studio dashboards, Shopify and creative testing, with a data-driven approach to hitting acquisition targets.

COVER LETTER

Dear Hiring Manager,

Your brand sells where I have spent the last four years working: UAE ecommerce. At ShopEasy LLC I manage AED 40,000 a month in Meta and Google Ads across three brands, and by restructuring campaigns and testing more than 60 creatives I raised ROAS from 2.1x to 3.4x in six months.

The role asks for someone who can own paid acquisition and report on it clearly. I build weekly Looker Studio dashboards for our management team and track conversions end to end with GA4, so decisions are made on numbers rather than guesses.

Before Dubai, I ran Facebook campaigns for twelve clients at BrandHive Agency in Dhaka, including electronics brands, and set up Pixel and conversion tracking for their sites. I have also started automating reporting with n8n, which fits your interest in marketing automation.

I would welcome the chance to discuss how I can help you hit your ROAS and CPA targets on Noon, Amazon.ae and Shopify.

Sincerely,

Rahim Ahmed
